## PROFESSIONAL SUMMARY

Results-driven AI & ML Engineering student (CGPA: 8.1/10) graduating 2026 from AKTU Lucknow, with hands-on expertise in Python development, large language model (LLM) integration, deep learning (CNN/TensorFlow), and autonomous AI agent development. Winner of GDG TechSprint Hackathon 2026 (1st Place, 200+ teams) and Smart India Hackathon 2025. Proven track record of building production-grade, AI-native systems using Gemini API, OpenAI GPT, speech recognition, REST APIs, and multi-agent frameworks (LangGraph, CrewAI). Seeking a software engineering or AI/ML role to deliver scalable, data-driven solutions.

## EDUCATION

**Bachelor of Technology – Computer Science Engineering (AI & ML)** *AKTU, Lucknow | Grad. 2026*

*CGPA: 8.1*

## TECHNICAL SKILLS

**Programming Languages:** Python, C, C++, JavaScript, HTML, CSS
**AI / ML & Deep Learning:** LLMs, NLP, CNN, Deep Learning, AI Agents, Prompt Engineering, Fine-tuning
**Frameworks & Libraries:** TensorFlow, Keras, Pandas, NumPy, OpenCV, LangGraph, CrewAI
**APIs & Integration:** Gemini API, OpenAI GPT API, REST API, ADB, GitHub API
**Databases:** MySQL, SQLite
**Cloud & DevOps:** CI/CD Tools, GitHub Actions, Linux
**Developer Tools:** VS Code, Jupyter Notebook, Anaconda, Git, GitHub, Canva, Google Collab
**Concepts:** System Design, API Integration, Multi-Agent Systems, MLOps, Data Preprocessing

## INTERNSHIP EXPERIENCE

**Python Developer Intern** | Y-Hills Edutech Pvt. Ltd. *March 2025 – May 2025*

- Developed 5+ scalable Python applications and automation scripts, improving team workflow efficiency by 35%.
- Processed and cleaned large datasets using Pandas & NumPy for ML pipeline readiness; reduced preprocessing time by 40%.
- Built and deployed ML prediction models; integrated Gemini & GPT APIs to deliver AI-powered product features.
- Collaborated on real-world data analysis projects, translating business requirements into data-driven, production-ready solutions.

## PROJECTS

### Alpha — LLM-Based Smart AI Assistant

- Designed Voice to LLM to Action pipeline; automated 10+ system tasks (app launch, data lookup), saving 60% manual effort.
- Integrated Gemini API for NLP query handling with a modular tool-calling system for real-time task execution.
- Built speech recognition module enabling fully hands-free AI assistant operation with persistent MySQL session storage.
- **Tech Stack:** *Python, Gemini API, Speech Recognition, ADB, MySQL, Ollama, Claude AI, ChatGPT, NLP, API Integration.*

### LeafLens — Crop Disease Detection using CNN

- Trained CNN model with data augmentation achieving 92%+ classification accuracy across 10+ crop disease categories.
- Reduced disease misclassification by 30% through advanced image preprocessing (normalization, rotation, flipping).
- Designed for real-world agricultural deployment — supports early detection and smart farming decision-making.
- **Tech Stack:** *Python, Deep Learning (CNN), TensorFlow or Keras, OpenCV, NumPy, Image Processing, Claude AI.*

### AI DevOps Agent (Autonomous CI/CD Healing System)

- Built an autonomous AI DevOps agent to analyze GitHub repositories and automatically detect and fix CI CD pipeline errors.
- Implemented a multi agent workflow to identify syntax, logic, and integration issues and ensure all test cases pass iteratively.
- Developed a React based dashboard to display repository insights, fixes applied, and real time CI CD pipeline status.
- **Tech Stack:** *Python, React.js, AI Agents (LangGraph or CrewAI), GitHub API, Docker, CI CD Tools*.

## ACHIEVEMENTS & CERTIFICATIONS

- 1st Place — GDG TechSprint Hackathon 2026 (National, 200+ competing teams), won google swags & merchandise. View
- Rank 7 — RIFT'26 Organised by Physics Wallah (National) , won merchandise. View
- Winner — Smart India Internal Hackathon 2025. View
- Certification: Career Essentials in Generative AI — Microsoft & LinkedIn Learning. View
- Rank 23 — HyperSpace Innovation National Hackathon 2026, won goodies.
- Round 2 Qualified — Adobe India National Hackathon 2025.
